Summer Facemask* Fun

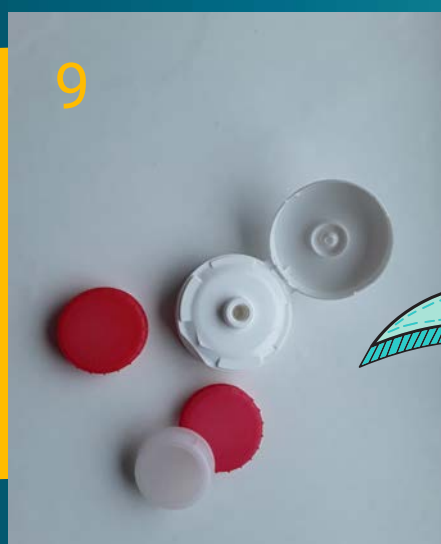

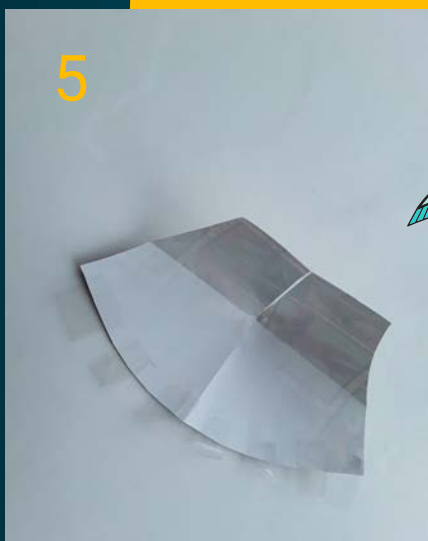

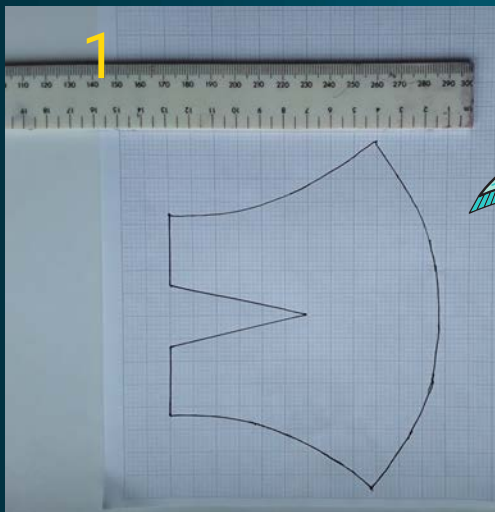

make
at
home!

What you will need:

- Template
- Paper: patterned or plain to decorate as you wish
- Glue
- Scissors
- Sticky tape
- Elastic or
- Elastic bands
- Bottle tops (extras)
- Paper clips (might be helpful)

How to make a paper facemask:

1. Download and print a mask template (or create from photo 1)
2. Cut out your paper, I folded my paper in 4 and used a paperclip to hold the template in place
3. Cut the 'darts'
4. If you are going to decorate it, do that next
5. Using sticky tape, join the darts together
6. Using sticky tape join the 2 fronts together
7. Using sticky tape add about 10 cms of elastic to the sides
8. Finished!
9. Unless you would like to pimp it up with sticking on household items such as used bottle tops!

What type of mask does
this look a bit like?
